Mix:	2 oz (60 ml)	Teinture
	2 oz (60 ml)	Crème Developer 20 Volume

Formula for high lift color:

Mix:	2 oz (60 ml)	Teinture
	2 oz (60 ml)	Crème Developer 30/40 Volume

Teinture processing time: 45 minutes

Formula for adding Amplifiers to existing formula to intensify tone:

Mix:	½ oz (15 ml)	Amplifier
	1½ oz (45 ml)	Teinture
	2 oz (60 ml)	Crème Developer appropriate volume

How to mix: For adding vivid and intense tone to your existing formula. Mix ½ oz. of your chosen Amplifier shade and 1½ oz of Teinture formula, then add 2 oz of appropriate Crème Developer.

DIMENSIONAL COLOR FORMULAS

using:

Teinture
Zero Ammonia Permanent Color
and
Color Instantané
Refresher, Intensifier and Modifier

Formula for regular color and touch-ups using Teinture and Color Instantané:

Mix:	2 oz (60 ml)	Teinture
	1 oz (30 ml)	Color Instantané
	1 oz (30 ml)	Crème Developer 40 Volume

Formula for high lift color:

Mix:	2 oz (60 ml)	Teinture
	1 oz (30 ml)	Color Instantané
	1 oz (30 ml)	Crème Developer 60 Volume

Teinture processing time: 45 minutes

Formula for demi-permanent color:

Mix:	2 oz (60 ml)	Color Instantané
	1 oz (30 ml)	Teinture
	1 oz (30 ml)	Crème Developer 10 Volume or 20 Volume for lighter hair

Formula for color depositing and glazing:

Mix:	2 oz (60 ml)	Color Instantané
	1 oz (30 ml)	Teinture
	1 oz (30 ml)	Crème Developer 10 Volume

Formula for restoring color to faded hair:

Mix: 2 oz of similar Color Instantané shade to the rest of your client's touch-up formula. Mix well, and apply from root to ends. Leave on for 40 to 45 minutes, then rinse, and shampoo with Mastey Restore shampoo.

Formula for ultra light toners on pre-lightened hair and highlights:

Mix:	3 oz (90 ml)	Color Instantané
	½ oz (15 ml)	Teinture
	½ oz (15 ml)	Crème Developer 20 Volume

Formula to restore and correct toners and brassy highlights:

Just choose the Color Instantané shade that matches for client's toner shade and apply directly to hair or the highlighted areas. Leave on for 15 to 20 minutes, then rinse only. No peroxide is needed.
